CONTENTS OF VOLUME 61

Volume 61 Nos. 1–2 2006

Special Issue
Semiotic Perspectives in Mathematics Education
A PME Special Issue
Guest Editors: Adalira Sáenz-Ludlow and Norma Presmeg

Advice to Prospective Authors v–vi

Guest Editorial

ADALIRA SÁENZ-LUDLOW and NORMA PRESMEG / Semiotic Perspectives on Learning Mathematics and Communicating Mathematically 1–10

Section 1: Semiotics and Epistemology

MICHAEL OTTE / Mathematical Epistemology from a Peircean Semiotic Point of View 11–38

LUIS RADFORD / The Anthropology of Meaning 39–65

PAUL ERNEST / A Semiotic Perspective of Mathematical Activity: The Case of Number 67–101

Section 2: Implications of Semiotics for Teachers and Students in the Classroom

RAYMOND DUVAL / A Cognitive Analysis of Problems of Comprehension in a Learning of Mathematics 103–131

HEINZ STEINBRING / What Makes a Sign a *Mathematical Sign*? – An Epistemological Perspective on Mathematical Interaction 133–162

NORMA PRESMEG / Semiotics and the "Connections" Standard: Significance of Semiotics for Teachers of Mathematics 163–182

ADALIRA SÁENZ-LUDLOW / Classroom Interpreting Games with an Illustration 183–218

Educational Studies in Mathematics (2006) 61: 409–410
DOI: 10.1007/s10649-006-8200-z

Section 3: Implications of Semiotics for Research

CANDIA MORGAN / What Does Social Semiotics have to Offer Mathematics Education Research? 219–245

SIGMUND ONGSTAD / Mathematics and Mathematics Education as Triadic Communication? A Semiotic Framework Exemplified 247–277

Commentary Paper

MICHAEL H.G. HOFFMANN / What is a "Semiotic Perspective", and What Could it Be? Some Comments on the Contributions to This Special Issue 279–291

Instructions for Authors

Volume 61 No. 3 2006

BRENT DAVIS and ELAINE SIMMT / Mathematics-for-Teaching: An Ongoing Investigation of the Mathematics that Teachers (Need to) Know 293–319

S. PHILEMON NTENZA / Investigating Forms of Children's Writing in Grade 7 Mathematics Classrooms 321–345

ADRIAN SIMPSON and NADA STEHLIKOVA / Apprehending Mathematical Structure: A Case Study of Coming to Understand a Commutative Ring 347–371

YVETTE SOLOMON / Deficit or Difference? The Role of Students' Epistemologies of Mathematics in their Interactions with Proof 373–393

ANALÍA BERGÉ / Convergence of Numerical Sequences – A Commentary on "The Vice: Some Historically Inspired and Proof Generated Steps to Limits of Sequences" by R.P. Burn 395–402

R.P. BURN / Letter to the Editor 403–407

Volume Contents 409–410
